

WHAT WE DO

Animal Health Division

We develop APIs and advanced intermediates for both farm and companion animal health segments, offering in-house products and contract manufacturing from cGMP-compliant facilities. In addition to our existing product pipeline, we are expanding with early-stage development projects focused on complex chemistry and high-value molecules.

Animal Health Business

10+
Animal Health
focused APIs

4+
Existing relationships
with Animal Health
innovators

57
Dedicated R&T resources
in 4 dedicated labs
